Honorone, June 2nd, 1893.

WHEN the Hon. T. H. WHITEHEAD, on the 9th May, 1892, proposed in the Legislative Council-the appointment of a Commission with full powers to enquire into and report on the working of all the Departments of the Government with a view to retrenchment and to the desirability or otherwise of the distribution of work, the amalgamation of certain offices, the increasing of the hours of the official day, privileges in the way of leave, etc., be was told by the Colonial Secretary that all these were matters of administration which lay peculiarly within the province of the Government to adjust, Paracels, he passed hundreds of empty kerosine and on which the Government did not re- oil cases. quire the assistance of a Commission; also that they had already engaged His Excellency's attention, and that the hon, mover of the resolution and the Council at large might rest assured that His Excellency would deal with them from time to time as opportunity might offer with a view to until the middle of July. economy and in the best interests of the Government service. Subsequently, in a certain after dinner speech, His Excellency announced that he had a scheme for reducing the expenditure in the public Departments, in the course of time, by \$60,000 a year. In his speech at the opening of the present session of the Legislative Council, His Excellency gave some -little indication of the nature of this scheme. The Civil Service, he said, was to a certain extent over officered and the salaries of the clerical service were capable of reduction as vacancies occurred. The reorganization of the clerical service he estimated would effect a saving of between \$25,000 and \$30,000 a year, while with regard to the Civil Service continue his voyage to Shanghai in a cargo ment had not been returned. One question proper he had seggested to the Secretary of Steamer which sailed about six none later. Immediatory suggested to the Secretary of This vessel was the China Mutual Company's that is why, if it is necessary to deport such ments and also reduction of salaries as opwith the other passengers in the P. & O. All last year the Government that the Naval Administration is separated from was supposed to have under its consideration the Naval Command, the former being placed In-Patients remaining in Hospital on the necessity of economy and retrenchment, under the Minister of the Navy and the latter

liture. And in view of the recent increase of salaries and of the fact, vouched for by Governor, that the service is overmanned, it is difficult to see what possible excuse there can be for the further increase in expenditure on salaries last year. It is true the total oxpenditure of the Colony in 1892 shows a reduction on that of the previous year, the not decrease being \$106,249, but this is more than accounted for by a decline of \$151,996 in the military expenditure (due to the fact that 1891 had to bear arrears of the contribution for 1890) and a decline of \$120,650 on public works extraordinary. Deducting

these two items and the charge for the public Quadrille debt from the account we have an increase of over \$150,000 in the cost of our ad-ministrative machinery. A nice commentary this on the Governor's retrenchment scheme and on the statement that "the Referring to the gale at Kobe on the 20th ult. the Hyogo Netos save :- The Imperiouse Government does not require the assistance which came up outside, experienced the full force of a Commission!" > triot in the vicinity of Asuma-fuji is entirely there has been no volcanic eruption, in the generally understood sense, but rather an outborst of steam such as that which tore Bandaisan in two and scattered one half of it over the neighbouring country in 1888. Whatever the tremendous agency may have been, it is not yet at rest, for another telegram from Fukushima announces that at 7.24 a.m. on the 20th instant a second eruption took place in the immediate neighbourhood of the first, and adds that the sky above the mountain was covered with dense smoke at the time-1 p.m.-of despatching the message. Probably the term smoke is not to be understood literally. In the case of Bandaisan a great cloud rose from the point of explosion and spread over the district, but it consisted chiefly of dust and liquefied mud, though the people of the Prefecture described it as smoke. It is impossible, however, to speak with any assurance as yet. Latest intelligence from Fukushima published by the News Agency says that five oraters have been developed, that all are belohing forth black smoke and scattering ashes to a distance of miles, and that the stream of the Sugawa is white with ash. There are hot springs in the vicinity of the eruption, but they are not resorted to until a late period in the summer. Had the eruption occurred in August, many lives would doubtless have been secrificed. Japan
